Technical Note
(tcpgps_android_en_v20_001_play_store_license)

TcpGPS 2.0 installation from Google Play Store

Update Date

30/10/2020

Requirements

Hardware:
Device with **Android 6.0.0**+

Software:
TcpGPS v2.0.0+ for Android

Objective

TcpGPS 2.0 installation from Google Play Store if a previous version installed from our distributable APKs is present on the device.

Details

In case you have installed any of our distributable APKs of TcpGPS 2.0 it is recomendable to follow some previous steps for reusing your license:

1. Copy or store your license credentials. You can find them in **Menu > Application > License**. Your credentials are your **email**, **country** and **activation code**.
2. Release the license from your current installed TcpGPS. To do that, go to **Menu > Application > License** and click on **Release License** button.
3. If the license was released successfully, uninstall the TcpGPS.
4. Install the TcpGPS 2.0 from **Google Play Store** using the link:
5. Request your license using your own code adding **gps2** at the end of it. For example, if your code was **WWWWXXXXYYYYZZZZ**, then your new code is **WWWWXXXXYYYYZZZZgps2**.
