> Management of licenses in TcpGPS Android.

Details

Requesting a license

For requesting a *DEMO license* of **TcpGPS Android** it is only needed to fill the form that appears after starting the application asking for your **email** and **country**.

In addition, if you already have an **activation code**, you can type in the field displayed when check the *I have an activation code* mark. This will request a full license for you.
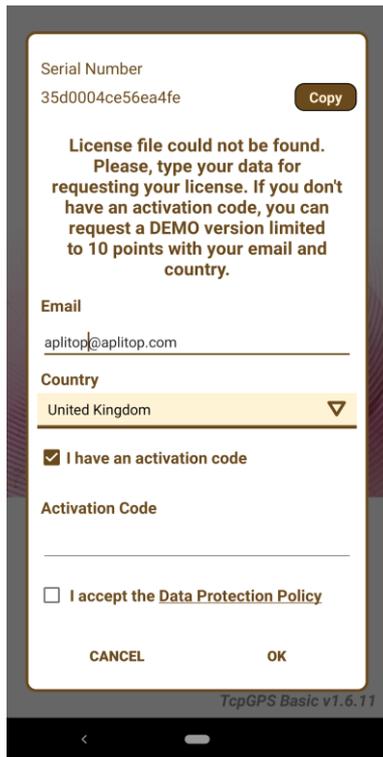

**Figure 1. Main form for requesting a DEMO/FULL license**

Figure 2. Initial dialog notifying a DEMO license installed

If you have a *DEMO license* and you recently purchase an **activation code**, you can request your *FULL license* by typing it in the corresponding field located in the dialog that appears at the start of the application. If don't have an **activation code** and you want to purchase one, you only have to click on the **Purchase License** button and you will be lead to Aplitop web form for requesting it.

Releasing a license

If you want to release the license from your current working device because you want to move it to another device or you want to reset your device, you must *release the license* in order to request it again.

Figure 3. License screen

To do that, you must go to **Menu > Application > License.** In that section you have information about your license, device and TcpGPS version. By pressing the **Release license** button. When the releasing process finish, your app will notify you that you don't have the license and it will return to the starting screen.
