

Technical Note (Check_OpenGL_Version)

Checking the OpenGL version

Date of last update

07/07/2022

Objective

Check the OpenGL (Open Graphics Library) version of the system's graphics card. This is important to ensure compliance with the performance requirements of some applications.

Details

1. Download and install the free [OpenGL Extensions Viewer](#) app.
2. Run the application, and within the **Tasks** menu, click on Summary.
3. Check the OpenGL **Version** of the GPU (marked in red on the figure)
