

Process for obtaining, installing and activating the TcpStereo DEMO

(TcpStereo_en_v2.0_process_obtaining_installing_activating_DEMO)

Update Date

16/04/2021

Details

- 1) The user enters the Aplitop website (www.aplitop.com), TcpStereo product and requests an evaluation version.
- 2) The WEB page displays a form to be filled in by the user.
IMPORTANT: If you have previously requested the download with the same email address, you may not receive the download link for the TcpStereo installer.
- 3) The user receives by e-mail the link to download the application installer.
- 4) The user downloads and runs the installer. This causes the TcpStereo application to be installed on the user's machine.
- 5) The user starts the application and is shown the initial window:

Select request method :

Figure 2 – Registration window

In this window, the user must fill in the fields marked with *. If the "Fax" button is clicked, the notepad will open, filled with text, which must be sent to Aplitop. If the "e-mail" button is clicked, the user's default e-mail application will open, with a new e-mail for registro@aplitop.com, which should be sent to.

- 7) Once the activation request has been received by Aplitop, the user will be sent an e-mail with the activation code.
- 8) When the user receives the activation code, he/she must click on the "Activate" button in the initial window (Figure 1). The activation window, similar to the following one, will be displayed:

Demo activation

Request code:

Write here the Aplitop's answer code

Answer code:
